Berendsen, a leading European provider of textile maintenance services, searched the market for powerful software that could help them improve their complex and comprehensive budgeting process. Berendsen’s Office of Finance struggled to complete their reports in a timely manner with their lagging Business Intelligence (BI) system. With Prophix, Berendsen automated their core financial processes, allowing them to produce strategic reports on demand.

**Business Challenges**

Berendsen was using an early model BI system for reporting. Their BI system lacked a user-friendly interface and their Office of Finance was challenged by the long response times to generate reports. Berendsen’s BI tool also lacked advanced functionality, which hindered their ability to analyze their operations from a multitude of angles. As a result, they recognized a need for a financial automation solution that could integrate with their general ledger, Microsoft Dynamics AX.

**Why Prophix?**

After evaluating several Corporate Performance Management (CPM) solutions, Berendsen chose Prophix based on its user-friendly interface, advanced functionality and seamless integration with Microsoft Dynamics AX.
Results

Since implementing Prophix, Berendsen has successfully automated their budgeting, forecasting and reporting models. This has helped their Office of Finance establish a single version of financial truth through a unified data warehouse.

Berendsen’s end-users and controllers use Prophix to prepare the annual budget and to create management reports, all without having to involve IT.

About Prophix

Your business is evolving. Your systems should evolve too. Achieve your goals more successfully with Prophix’s innovative Corporate Performance Management (CPM) software. Improve profitability and minimise risk when you automate repetitive tasks and focus on what matters. Budget, plan, consolidate and report automatically. Whether in the cloud or on-premise, Prophix supports your future with a platform that flexes to suit your strategic realities, today and tomorrow.
